Course Descriptions

MATHEMATICS

$$\begin{array}{r} 2x \quad +3 \\ 3x \quad -2 \\ \hline -4x + 9x = 5x \end{array}$$

The Math Department is proud to partner with the Summer Academy to offer summer learning opportunities for MYP, as well as current and future DP Maths.

Mathematics for MYP (Grades 6-8): 8:20 to 12:00

This course introduces MYP mathematical topics and problem-solving skills that would be of interest to students who plan to study MYP Extended Mathematics.

Introduction to topics will include:

- Numerical and Abstract Reasoning (Number and Algebra)
- Thinking with models (Equations and Functions)
- Spatial Reasoning (Geometry and Trigonometry)
- Reasoning with data (Statistics and Probability)

DP 1 Preview (Grades 8-10): 12:00 to 13:20

This course is open to current Grade 9 and 10 students, with the possibility of advanced Grade 8 students. Students will preview the first DP semester of Maths: Analysis and Approaches. In particular, students will preview Topic 1 (Number & Algebra) and Topic 2 (Functions), with the possibility of previewing Topic 3 (Geometry & Trigonometry). In every session, we will practice past paper questions to reinforce our learning. Please indicate whether you are interested in taking Standard Level or Higher Level (Note: Current Grade 9 students may not sign up for Higher Level.)

DP 2 Preview (Grade 11): 14:00 to 15:20

This course is open to current Grade 11 students. The SL course will primarily preview Topic 5 (Calculus) and review DP 1 with past paper questions. The HL course will preview Topic 5 (Calculus) and explore difficult HL topics, including complex numbers, vectors, advanced integration techniques, and Maclaurin Series. HL students will practice past paper questions, including Paper 3 questions. Please indicate whether you are interested in taking Standard Level or Higher Level.

SAT PREP

SAT English Workshop (Grades 9-12): 8:20 to 11:20

This workshop offers a comprehensive view of the SAT verbal section. First and foremost, students will learn what the structure of the SAT verbal section is like, and become familiar with the types of questions, in addition to pacing, so that students learn how to deal with the pressure of the standardized exam time. Though the workshop will be focused on how to take the SAT verbal section better, the following will also be offered so that students can take the learning and apply them to future English courses: reading comprehension, vocabulary knowledge, critical thinking, literary analysis, and essay writing techniques. Students will become more involved through interactive lessons, as well as paired and small-group exercises.

Advanced Writing and Language for SAT (Grades 9-12): 12:00 to 15:20

This course is designed to help students review and gain a deeper understanding of writing at the high school level, in preparation for college and beyond. Beginning with the sentence, students can start with a “bricks and mortar” basis to develop paragraphs, then eventually become experts in argumentative writing through frequent essay-writing, in both short and long forms. Additionally, these skills will be applied to test-taking strategies for the SAT so that students can kill two birds with one stone!

SPORTS - In Cooperation with Seoul Sports

Morning Sports Program (Grades 6-10): 8:20 to 11:20

Afternoon Sports Program (Grades 6-10): 12:00 - 15:20

Join us at our Sports and Fitness Camp for a dynamic blend of fitness, fun, and learning! Our camp focuses on fostering a love for sports and promoting a healthy lifestyle through a variety of engaging activities. Participants will enjoy daily fitness classes, educational sessions, and interactive projects aimed at enhancing their understanding of fitness and health. With a diverse range of sports explored each day, campers will have the opportunity to develop multi-sport skills while discovering their passion for staying active. Our main goal is to inspire students to embrace sports and fitness as integral parts of their lives, fostering a lifelong commitment to health and wellness. Don't miss out on this exciting opportunity to ignite your child's passion for sports and fitness!

DRAMA

Page to Stage - Drama Class (Grades 6-8): 12:00 to 15:20

The afternoon "Page to Stage" Drama class with Ms. Vickers is an exciting opportunity for students to explore the process of taking beloved book characters and transforming them into fully realized live-action performances. Students will engage in the art of storytelling through reader's theatre, movement and speech workshops. Behind the scenes, students will have the opportunity to plan the costuming and props for their characters. They will engage in the art of makeup design by planning makeup maps and implementing their designs on their own faces! To further reinforce their learning, students will perform for their peers at the end of each session. The aim for this class is to explore creative choices and agency while working together in collaboration. Along the way, students will work on valuable skills of presentation, expression, leadership skills, and the use of imagination!

ENGLISH AS A SECOND LANGUAGE

Morning Program (Grades 6-8): 8:20 to 11:20

Afternoon Program (Grades 6-8): 12:00 - 15:20

The Grade 6-8 English class will embark on an exciting literary adventure with Mr. Johnston! Designed to immerse students in the world of storytelling, this program emphasizes building on students' existing reading, listening, speaking, and writing skills and taking them to new heights.

Through engaging activities such as discussing elements from popular texts, analyzing stories in film, learning the art of storytelling, and creating their own stories and books, students will unlock their creativity and hone their English skills. A special emphasis will be placed on character flaws, character development, world building, and the Hero's Journey. We will plan out our ideas for our novels, graphic novels, or short stories into 15 parts and learn what goes into each that makes a story enchanting and successful.

As we progress through the summer academy, students will bring their stories to life through creating a final product in the form of a physical book and/or ebook. Get ready for your student's imagination to soar as they embark on this unforgettable journey of creativity and language exploration.
